

The Book of Musical Patterns

Robert j Kirkpatrick

Dedicated to the Seattle Improv Meeting

The Book of Musical Patterns

All scores composed by Robert j Kirkpatrick 2006-2008

Usage Restrictions

All of these scores can be freely performed, recorded or studied without any licensing, notification or permissions so long as the composer is cited.

Individual scores, up to the entire book of scores, can be reproduced for individual, group or educational purposes.

No scores from the book, or the book itself, can be sold or published in other works without citation.

Individual scores can be reproduced in whole or in part for album covers, liner notes, web pages, essays, articles or books as long as citation of the composer is included.

In general I encourage any and all uses of these scores; I want them performed, recorded and heard. Notification of performances, recording and the like would be appreciated.

Please address any questions or notification of recordings, performance or other pertinent information to **patterns@hollowearthrecordings.com**

Additionally I will publish any and all recordings of these scores on the Hollow Earth Recordings website. Details at **<http://www.hollowearthrecordings.com/bomp/>**

Table of Contents

Instructions

Part I: Regular Patterns

Patterns 1-5

Part II: Iregular Patterns

Patterns 6-10

Part III: Indeterminante Patterns

Patterns 11-20

Part IV: Scatterplot Clusters

Patterns 21-30

Part V: Pools of Sound

Patterns 31-40

Part VI: Swarms of Sound

Patterns 41-45

Part VI: Through Composed Patters

Patterns 46-50

Appendix I: Cluster Templates

Cluster Templates 1-10

Appendix II: CD Contents

Recordings of Selected Patterns

Instructions

General Rules

These instructions apply to all of the musical patterns, specific instructions associated with each pattern can add, amend or overrule these instructions.

- I. Each pattern should be played over a given time period set in advance.
- II. Space corresponds to time
- III. Within a symbol a sound event must be made, the same for each symbol.
 - a) The same class of sound event must be made for similar symbols
 - b) The particulars of the event are not specified
- IV. The spaces between events must have equal duration as space they take up in the set time
- V. When a sound source or event repeats that is a new "bar"
- VI. Sound sources or events can be played by one or more players. When there are more performers then differentiated events, these events can be doubled, but must follow the same time schema.

Performance Notes

- * Any instrument can be used that can meet the general requirements as well as any requirements of the particular score being played.
- * Pick a time scale for the score, divide the time scale by the number of "lines" of the score. Each line should be played for this duration in a consistent fashion
- * Each symbol should have its own sound event associated with it. A lack of a symbol should be silence.
- * The sound event for each symbol should always be the same for some value of "same"
- * Durations of the sounds for each symbol can always be shorter than the amount of space it takes up unless the symbol stretches across the normal symbolic width in which case it must be played for a duration equivalent to the space it uses.
- * Spaces between events are equivalent to time and nothing should be played for the duration.
- * Variation within the sound events is determined by the player, unless the symbols themselves vary in size, positioning and so on.
In this case a variation should be assigned to this difference (i.e. dynamics, duration, etc).
- * Each indicated sound source (s1, s2, etc) can be done by one or more players.
 - If there are too many simultaneous events for one player then multiple performers are required
 - If there are more performers than sound sources, there can be more than one player per sound source.
- * One can always choose to not make a sound for an individual symbol, but one cannot choose to make a sound during the spaces.

Music in Parts

Any piece can be played simultaneously with any other piece. The pieces for individual performer and unspecified sound sources are especially suited for this. The normal patterns can be mixed in as well though their specific rules should still be observed. Any part can be performed by more than one performer

The Book of Musical Patterns

Part I Regular Patterns

N° 1
(for two sound sources)

N° 2
(for two sound sources)

N° 3
(for two sound sources and optional events)

N° 4
(for 3 sound sources)

N° 5
(for optional events)

The Book of Musical Patterns

Part II Irregular Patterns

N° 6
(For two sound sources)

Nº 7
(for two and three sound sources)

(for one sound source doubled)

[illegible]

(for one sound source with multiple optional events)

N° 10
(for unspecified events)

The Book of Musical Patterns

Part III Indeterminate Patterns

N° 11

(For 3 sound sources with differing events)

s3	_____																		

Performance Notes

- 1) Each event should be as short as possible with these exceptions:
- a) Symbols that are larger then normal. These should be played for a natural duration (i.e. natural ring, bow stroke, breath, etc)
- b) Symbols stretching across more then normal space. These should be continuous tones throughout their length
- 2) All events should be allowed to fade completely away before the next event is played

N° 12
(for 3 sound sources)

N° 13
(for solo performer)

N° 14
(for 3 sound sources)

N° 15

(for one sound source of varying magnitudes)

Performance Notes

Nearby sounds can be clustered at the performers discretion
The meaning and application of "magnitude" is up to the performer.

N° 16

(for clusters of sounds)

N° 17
(for three layers of long sounds)

This is the fourth in a four part piece along with numbers 17,18 and 19

The Book of Musical Patterns

Part IV Scatterplot Clusters

These ten musical patterns all use the following system

- * Each performer is to be randomly given one of the Cluster Patterns found in Appendix I
- * Place the Pattern over the page aligning them top and bottom
- * Performance follows the usual order: left to right starting from the top and moving to the bottom
- * A time is chosen for the piece
- * The Player should make sound as symbols are visible on their score
- * The performer can choose to not make a sound, or to play clusters of sounds.
 - No more sounds than symbols should be played
 - The symbols must be played as clusters
 - Clusters can be partitioned into multiple clusters as long as each one is more than one sound
- * Dynamics vary based on symbol size, but should range from very quiet to mid volume.

Nº 21

N° 23

Nº 24

N° 25

N° 27

N° 28

The Book of Musical Patterns

Part V Pools of Sound

- * Pools of sound arise from the space in which they are set.
- * Each pool should be approached individually with common elements providing the structure.
- * The path through the pools is up to the performer.
- * Spaces between the pools must be observed and should be also be a structural element.
- * A pool should be thought of as a system which can have multiple elements: a sound, but also its duration, repetition, dynamic and so on.
- * How the characteristics are determined is up to the performer but whatever structure is applied should form the basis for those that share symbolic features.
- * Drops of sound should be related to pools as a drop of water is related to a pool of water.

N° 31

(for three sound sources)

N° 32

(for three sound sources)

N° 33
(for solo performer)

N° 34

(for three isolated overlapping sound sources)

N° 35
(9 pools of sound)

№ 36
(for drops of sounds)

N° 37
(pools and drops)

N° 38
(paired pools)

N° 39
(Varied isolated events)

N° 40

(large pools and small drops)

The Book of Musical Patterns

Part VI Swarming Patterns

N° 41

Nº 42

N° 43

N° 44

Nº 45

The Book of Musical Patterns

Part VII
Through Composed Patterns

N° 46

N° 50a

(For two sound sources in 12 parts)

<div>(one)</div> <div>s1</div> <div>s2</div>	
<div>(two)</div> <div>s1</div> <div>s2</div>	
<div>(three)</div> <div>s1</div> <div>s2</div>

The Book of Musical Patterns

Appendix II: Companion CD Contents

The Seattle Improv Meeting plays from the Book of Musical Patterns

Track 1: N° 11 (16'00")

2007-02-07 Meeting

Eric A. Peacock: Laptop, assorted percussion

Andrew Woods: Guitar, voice, valveless tube-horn assorted percussion

Robert j Kirkpatrick: Prepared Wire Strung Harp, electronics

Track 2: N° 17 (20'11")

2007-06-12 Meeting

Eric A. Peacock: Laptop, assorted percussion

Andrew Woods: Guitar, voice, assorted percussion

Robert j Kirkpatrick: Prepared Wire Strung Harp, electronics

Track 3: N° 24 (10'08")

2008-08-06 Meeting

Eric A. Peacock: Laptop, assorted percussion

Andrew Woods: Guitar, voice, electronics

Robert j Kirkpatrick: Prepared Wire Strung Harp, electronics

Track 4: N° 26 (7'12")

2008-08-06 Meeting

Eric A. Peacock: Laptop, assorted percussion

Andrew Woods: Guitars, assorted percussion, electronics

Robert j Kirkpatrick: Prepared Wire Strung Harp, electronics

Track 5: N° 47 (10'19")

2008-6-18 Meeting

Eric A. Peacock: Laptop, assorted percussion

Andrew Woods: Guitar, voice, electronics

Robert j Kirkpatrick: Prepared Wire Strung Harp, electronics

Track 6: N°s. 9, 13, 15 (10'09")

2008-01-08 Meeting

Eric A. Peacock: Bass Box

Andrew Woods: Guitar

Robert j Kirkpatrick: Prepared Wire Strung Harp
